BOOKS

The Stars - A New Way to See Them, H.A. Rey (Houghton Mifflin Co): The author of *Curious George* makes finding constellations a cinch.

Earthwatch, Charles Sheffield (Macmillan, 1981): Landsat photos in exquisite focus, tremendous depth of color and variety of form - well printed, too.

The Red Limit, Timothy Ferris (Bantam): A readable history of modern cosmology. Explains Ylem!

Galaxies, by the same author (Stereo Club Books): An expensive coffee-table book, but lovely.

Briefly Noted: (Selected from Amy Marsh's list)

Space Colonies, Stewart Brand; The Third Industrial Revolution, G. Harry Steiner; The Hunger for Eyes, Barbara Man Hubbard; The Study of the Future, World Future Society; American Conspiracy, Marilyn Ferguson; Nuclear Madness, Helen Caldwell; The Right Stuff, Tom Wolfe; Sanctifiers, James Burke; Comets, Carl Sagan.

A LITTLE OFF THE SUBJECT, BUT...

YLEM IS the **Primerial Stuff** out of which the universe emerged. It's pronounced eye-lem. The emerging art-and-science group Ylem was featured in the June newsletter of the Center for the Visual Arts in Oakland. This center strives to be a comprehensive slide archive for art being done in this region. It welcomes slides and memberships.

THE REASON that the newsletter is so thin is that the mailing list is so fat! The 74 members found a copy of it enclosed. The list also included a number of allied organizations. All people joining Ylem hereafter will receive a copy of it. Thanks to memberships, income and expertise about before.

COVER DESIGN is by Geoffrey Chandler. You may have seen his work in *OMNI* magazine, on album covers, or at galleries such as Just Dancers, Amber gallery, or the Oakland Museum. He is fascinated by the luminous mix of galaxies, and conveys this magical quality using etchings on large canvases.

MEMBERS IN THE NEWS: Ted Seltzer's paintings were shown in color in the April Popular Computing.... Carle Adell was given a merit award by the International Gold Corporation... Edith Smith will have an article about her computer-aided etchings in Leonardo, Fall '82... Bank of America Headquarters has purchased a piece by Dorra Van Dyk... Jerome Kirk has just installed two outdoor kinetic sculptures at Bayshore in Menlo Park, and Water Office Plaza in San Mateo.

THE STUDIO OF Jerome Kirk is being opened to us for the annual meeting at 4 PM, Sunday Aug. 13th. A potluck follows, along with a tour of his studio. We will attempt to roll down some attractive ideas floating around such as expanding the newsletter, printing up hard-to-get data on unusual techniques, selling fractal T-shirts, acquiring non-profit status, and any that you may bring. We will find a way to continue our successful computer graphic companies tours, our efforts to find a site for a group show, and varied bi-monthly programs. Incidentally, the last graphics tour went to Cromwell and Videco. Two cars-full of people went, paying \$5 plus lunch. Thank to Eleanor Kant, who arranged this one!
